

COOKIES POLICY

We've updated our Cookies Policy on 26-07-2024.

About cookies

What are cookies?

Cookies are small text files containing a string of characters that can be placed on your computer or mobile device, which uniquely identifies your browser or device. We may use technologies such as cookies, pixels and local storage to deliver, secure and understand products, services and ads.

What are cookies used for?

Cookies and other technologies allow a site or services to know if your computer or device has visited it before. These technologies can then be used to deliver products, services and ads, help us understand how the site or service is being used, help you navigate between pages efficiently, help us remember your preferences and generally improve your experience of using our services. Cookies can also help ensure that the marketing you see online is more relevant to you and your interests.

Why does Tripster use cookies and similar technologies?

We use cookies, pixels, local storage and similar technologies to show you relevant content, improve your experience and help protect Tripster and our users. We may use these technologies to deliver the service, provide you with a service that is easy to use, enable you to move around the service and use its features, such as accessing secure areas, and store information so that Tripster responds faster. We may use these technologies to collect information about how you use the service, for example, which pages you go to most often and whether you get error messages from certain pages. We may use these technologies to allow us to remember choices you make (such as your username, language or the region you're in) and tailor the Service to provide enhanced features and content for you. These cookies can also be used to remember changes that you've made to the text size, font and other parts of pages that you can customise. Tripster or our advertising partners may use these technologies to deliver advertising that is relevant to your interests. These technologies can remember that your device has visited a site or service and may also be able to track your device's browsing activity on other sites or services other than Tripster. This information may be shared with organisations outside Tripster, such as advertisers and/or advertising networks to deliver the advertising, and to help measure the effectiveness of an advertising campaign. *We may use these technologies to understand, improve and research products and services.

How long will cookies stay on my device?

The length of time that a cookie will stay on your computer or mobile device depends on whether it is a "persistent" or "session" cookie. Session cookies will only stay on your device until you close your browser. Persistent cookies stay on your computer or mobile device until they expire or are deleted.

First- and third-party cookies

First-party cookies are cookies that belong to Tripster. Third-party cookies are cookies that another party places on your device through our service. Third-party cookies may be placed on your device by someone providing advertising, measurement, marketing and analytics services to Tripster, or to provide certain features and improve our services for you. For example, other companies' cookies can help us understand how our service is being used. Third-party cookies may also be placed on your device by our business partners so that they can use them to advertise products and services to

you elsewhere on the Internet, to measure the performance and effectiveness of those ads, and to support marketing and analytics.

How can you control cookies?

We use cookies to help personalise and improve content and services, provide a safer experience and to show you useful and relevant ads on and off Tripster. You can control how we use data to show you ads and more by using the tools described below.

Follow the instructions provided by your website or mobile browser (usually located within the "Help", "Tools" or "Edit" facility) to control our cookies on other apps and websites, and cookies from other companies on Tripster. Please note that if you set your browser to disable cookies or other technologies, you may not be able to access certain parts of our Service and other parts of our Service may not work properly.

In addition, your browser or device may offer settings that allow you to choose whether browser cookies are set and to delete them. These controls vary by browser and manufacturers may change both the settings they make available and how they work at any time. As of 23 June 2021, you may find additional information about the controls offered by popular browsers at the links below. Certain parts of the Tripster may not work properly if you have disabled browser cookie use.
